Message (200 Word Maximum):

Originally from Soda Springs, Idaho, I moved to Honeyville six years ago to get back to the small-town rural lifestyle that I cherished in my youth. I've worked in software and technology throughout my career. Having visited twenty-six countries, I have a significant perspective on what it means to live in Honeyville, and I can honestly say there is no place as beautiful, rich, and peaceful as Honeyville.

A recent survey of Honeyville residents shows that the majority of Honeyville citizens want to preserve our agricultural roots and rural setting. I believe we can do that, while at the same time wisely dealing with future challenges.

I call this a "Heritage...Forward" approach. Simply put, it's a way of approaching today's decisions that prudently preserves our heritage for future generations.

As a Honeyville City Council member, I pledge to do all I can to build for the future without disregarding our past. I'll bring the courage, patience, creativity, discipline, and collaboration that our ancestors used to build this place in my effort to keep Honeyville a pleasant community that honors the past yet embraces the future.
